An Architectural Gem, Cape Elizabeth

TOWN & SHORE ASSOCIATES

Kelly Fleming of Town & Shore says: This architectural gem, designed by one of Maine's most prominent architects, presides over one of the most magnificent waterfront sites on the Cape Elizabeth coastline. Like a fine piece of art, the home's soaring, barn-like ceilings, wonderfully open floor plan, cozy den with a fireplace, and accommodating guest suite will captivate you. Built in 2014, the home is pristine with no detail overlooked. Enjoy central air, radiant heat, an automatic whole-house generator, and a Sonos and Bose sound system. The home is situated on two very private acres with a manicured lawn that rolls down to a pebbly beach. The landscaping also includes stone walls, a charming fire pit area next to the beach, and beautiful perennial gardens. Enjoy the crashing surf and the passing of cruise ships, the Cat ferry, oil tankers, lobsterboats, and sailboats from an Ipe deck that encompasses a gunite, saltwater, heated pool. This property is truly exceptional and maximizes the best of a Maine waterfront home.
